**WORKBOOK**

**≡ 2026 ≡**

A low-angle, close-up photograph of a person's legs and feet. The person is wearing camouflage-patterned pants and brown tactical boots with thick, treaded soles. They are walking on a dirt or gravel path. The background is a bright, hazy outdoor setting with some greenery in the distance. A semi-transparent white rectangular box is overlaid on the center of the image, containing text.

## OUR MISSION

At Garmont Tactical, we equip military and law enforcement professionals with footwear that delivers **protection, comfort, and performance** in the most demanding environments. By providing superior support and durability, we empower those who serve to carry out their duties **with confidence in every step.**

# PARTNER TECHNOLOGIES

GORE-TEX® technology offers reliable waterproofing and breathability for optimal comfort in wet conditions.

Ortholite® creates and produces custom footbed solutions that deliver unrivaled comfort and performance.

Vibram outsoles are trusted worldwide for their unmatched durability, grip, and performance. Built with advanced rubber compounds and innovative tread designs, they provide superior traction and stability.

D30® is the world's leading protection company. D30® impact protection material is engineered to absorb and disperse energy, offering advanced defense against impacts, vibrations and fatigue.

3M™ Thinsulate™ insulation provides lightweight warmth without bulk, trapping heat while allowing moisture to escape for all-day comfort, even in the harshest environments.

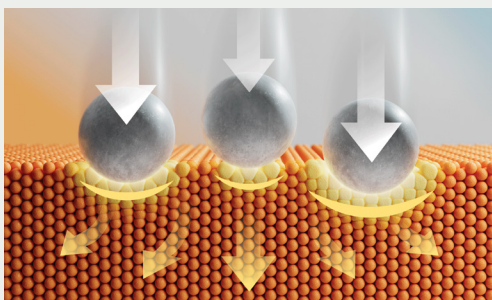

Arneplant® footbeds deliver comfort, breathability and long-lasting shock absorption, minimising the effort and stress on the sole.

## D30® Protected

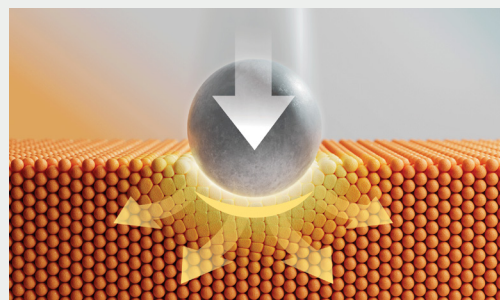

D30® is the world's leading protection company.

They produce an extremely innovative orange material that protects from harm caused by impact, vibration and fatigue. This revolutionary material is characterized by its exceptional softness and flexibility. Its unique structure allows it to effectively absorb and dissipate impact energy, then return perfectly to its original shape. This characteristic makes it ideal for applications requiring superior protection and comfort. Garmont is one of the first to apply this material to tactical footwear. The T8 Defense and T8 Specter boots use D30® material in the ankle area for added protection in the event of external impacts, as well as in the footbeds for superior protection underfoot. This advanced cushioning mechanism guarantees an increased level of comfort.

**Shock Absorption**

Non-sacrificial smart material stiffens to absorb shock, minimize fatigue and increase comfort.

**Impact Protection**

Non-sacrificial smart material stiffens to dissipate high impact energies and mitigate injury/damage.

# PROPRIETARY TECHNOLOGIES

Garment's Anatomically Directed Design (a.d.d.®) enables your foot's natural ability to stabilize, absorb shock and propel forward.

The contours of this anatomical last are smooth and rounded, to more closely follow the shape of the human foot.

The G-DRY membrane guarantees a windproof barrier with up to 10,000mm waterproof protection.

Garment Traction Formula soles:  
GTF Diamante: enhanced grip  
GTF Magnet: lightness and cushioning

A two-part system for superior shock absorption. The midsole dampens ground impact while the internal shock absorber dampens heel impact.

## ERGONOMIC WOMEN'S FIT

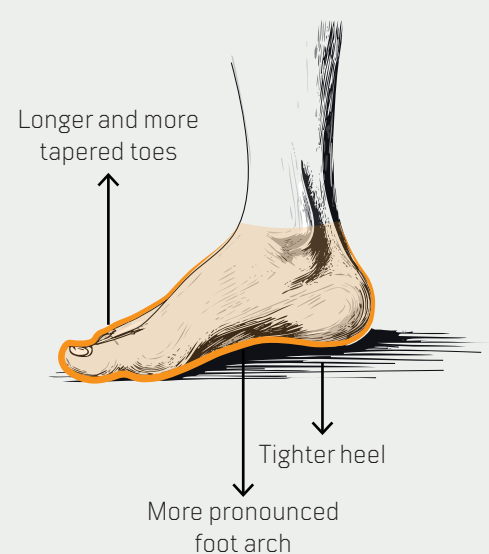

The male and female foot have specific anatomical and biomechanical differences. Generally, the female foot is smaller, with a slimmer structure and more tapered toes. The sole is often narrower and the arch of the foot more pronounced. In addition, the muscles of the female foot are less dense, while the joints are more flexible. Women also tend to walk with a shorter stride, distributing their weight more on the front part of the foot. With these differences in mind, we have set up a dedicated research area to ensure that our footwear best meets the needs of every foot.

### LASTING BOARD

Considering the same height, women tend to be lighter than men; the impact mechanics on the sole of the foot is 15% lower than for men. The lasting board should therefore be less rigid.

### DEDICATED WOMEN'S LAST

# MILITARY COLLECTION

At Garmont, we've spent over 60 years crafting high-performance footwear, starting in Montebelluna, Italy—a town renowned for its heritage in mountain shoes. In 2008, we took a bold step forward, entering the tactical market at the request of the U.S. Special Forces. They challenged us to create boots that could withstand the most intense demands of military operations, and we delivered.

Our first tactical boot, the T8 Bifida, quickly became a favorite among Special Forces operators for its rugged durability and exceptional performance. From there, we expanded our line with the T8 NFS 670 ("Need for Speed"), a lightweight, agile option designed for training and on-base wear. Both remain bestsellers in our catalog to this day.

Recognizing the evolving needs of those who serve, we have continued to expand our product line. From waterproof and insulated boots to mid-cut styles for specialized operations or off-duty wear, as well as protective boots and designs specifically crafted for women, our collection is built to handle diverse environments and missions. Each design reflects our unwavering commitment to crafting innovative, high-performance footwear that supports those who protect and serve.

Today, Garmont Tactical is trusted by soldiers around the world. With every step, our boots are designed to deliver the durability, confidence, and support you need to accomplish your mission.

# LAW ENFORCEMENT COLLECTION

At Garmont, we've built a legacy of crafting high-performance footwear for military professionals, and we're proud to bring that expertise to law enforcement. Our mission is rooted in creating reliable and supportive footwear for those who dedicate their lives to serving others. We are committed to equipping law enforcement officers with boots that provide unparalleled performance, endurance, and comfort, designed to meet the demands of their profession.

Our law enforcement collection offers a range of options, including uniform boots with polishable toes, mid-cut designs that balance versatility and comfort, protective boots for demanding situations, and styles specifically crafted for women. Each boot in our collection is thoughtfully designed to meet the needs of those who protect and serve, ensuring they have the confidence to perform at their best in every situation.

By applying the insights and technologies developed through our work with the military, we are expanding our reach to support law enforcement professionals in their mission to safeguard communities. With every design, we strive to honor their dedication, providing footwear they can trust in the moments that matter most.
